

A. Workshops

- 1. Rejuvenation techniques of the perioral area*
 - Intense Pulsed Light (IPL)
 - Deep peelings
 - Fillers
 - Radio frequency
- 2. Rejuvenation techniques of the frontal and periorbital area*
 - Botulin toxin
 - Ablative laser
 - Fillers
 - Carboxy-therapy
- 3. Rejuvenation techniques of the molar and mandibular area*
 - Lifting threads
 - PMMA
 - Radio frequency
 - Autologous plasma
- 4. Neck and bosom rejuvenation techniques*
 - Chemical peelings
 - Laser x Pulsed light (IPL)
 - Dermo-sustentation wires
- 5. Workshop on Carboxy-therapy*
- 6. Mega workshop on Laser / Pulsed light (IPL) and emergent technologies (8h)*
- 7. Advanced points and new indications for botulin toxin.*
- 8. Cellulitis: how I treat it*
- 9. Intradermotherapy in Aesthetic Medicine*
- 10. Rejuvenation of arms and hands*
- 11. Course of Scientific Documentation and Legal Basis for Aesthetic Medicine Practice*
- 12. Workshop on phenol peelings*

B. Surgical Workshops

1. Aesthetic surgery in ambulatory I

- Acne scars
- Eyebrow lifting
- Cryosurgery
- Aesthetic alterations on the nose

2. Hair transplant

3. Aesthetic surgery in ambulatory II

- Correction of ear lobule
- Subcision / Cellulitis
- Melanocyte transplant
- Eyebrow lifting threads

4. New indications of lifting threads for:

Face, buttocks, abdomen (periumbilical), arms and thighs

C. Mini-courses

1. How to set up and manage an Aesthetic Medicine clinic

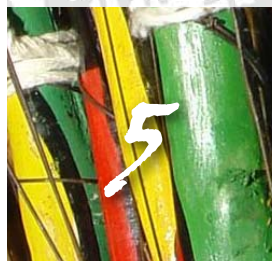

2. Preventive and therapeutic aspects in a photo-aged skin

3. Dynamic phototherapy and its indications in Aesthetic Medicine

4. Chemical peelings

Parallel Exhibition

A scientific and technical exhibition is being prepared and will be held on the same site of the 15th Congress. Companies and organizations are invited to display their products, devices and their services. An unique chance to be in contact with a highly selected public. Those interested in participating are requested to contact the Organizing Secretariat.

Conferences

- Future perspectives of stem cells in Aesthetic Medicine
- Therapeutical approach of cutaneous pigmentary alterations
- Hormonal aspects of aging in the female sex
- Up-to-date stage of photodynamic therapy
- Psychoanalytic approach of aesthetic treatments
- Brazilian Aesthetic Medicine Society - 20 years Retrospective

1. Cutaneous fillers

- Immunity aspects of cutaneous fillers
- Biocompatibility of implantation materials
- Best indications of cutaneous fillers
- Aesthetic odontology
- Fillers materials histological behavior
- New fillers
- Handling complications

2. Cosmetic indications of botulin toxin

- Immunity behavior of patients under continuous use of botulin toxin
- Anatomico-functional study of facial musculature and its importance in optimizing results
- Results optimization post-botulin toxin in facial rejuvenation
- Therapeutical confrontations of various commercial presentations
- New points and new indications in Aesthetic Medicine
- Handling complications

3. How I treat: cutaneous abdominal flaccidity

- Laser / Pulsed light (IPL)
- Radio frequency
- Lifting threads
- Carboxy-therapy
- Combined techniques
- Dermolipectomia

4. Cutaneous aging I

- Histological alterations
- Hormonal alterations
- Facial volume alterations
- Preventive measures
- Up-to-date stage and future perspectives in handling stem cells in cutaneous aging

5. *Cutaneous aging II*

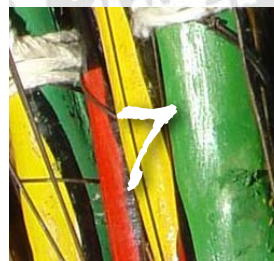

- Therapeutical approach
- Topical treatment - cosmetics and cosmeceuticals
- Stimulant therapeutics - Intradermotherapy/ poli-l-lactic acid
- Laser x Pulsed light (IPL)
- Russian threads
- Bulgarian tensors
- Chemical peelings
- Photodynamic therapy - PDT
- Facial remodelling with PMMA
- Surgical approach
- Complementary therapeutics - sleep, stress control, exercise, diet, antioxidants, tobaccoism, alcoholism
- GH

6. *II Symposium of Man's Inesthetic Problems*

- The male vanity
- Androgenetic alopecia
- Hair transplant
- Permanent depilation
- Seborrhea x Seborrheic Dermatitis
- Premature intervention in acne processes
- Face volumetric alterations
- Lifting threads
- Botulin toxin - when to indicate
- Axillary hyperidrosis
- Optimization in the overweight and obesity treatment
- Central obesity
- Intradermotherapy (fat, striae, alopecia, keloid and acne's cystic nodules)
- Abdominal fat. How I treat it.
- Resurfacing techniques
- Aesthetic surgery (gynecomastia, eyelid pouches, lifting)
- Andropause

7. *Cutaneous tumors*

- Differential diagnosis and its importance in selecting the treatment.
Dermatoscopy
- Cryosurgery
- Electrocauterization
- Surgical exeresis
- Photodynamic therapy
- Moss's surgery

8. Orthomolecular therapy in Aesthetic Medicine

- Diagnosis and treatment of intoxication caused by heavy metals
- Therapeutical nutritional approach in case of chronic fatigue
- Integration and regulation of metabolism
- Ortomolecular utilization of vitamins and minerals
- Curcumim, Revertastrol and Picnogenol: Importance in the antioxidant strategy
- Alimentary biotechnology

9. Interactive Board – My most difficult case

The Organization Committee invites the enrolled participants to submit to the event's organization their case of difficult resolution, accompanied by a brief clinical report, photographic documentation and eventual complementary exams.

The selected cases will be presented and four therapeutical alternatives proposed in an interactive way to those present and later discussed with the components of the board.

10. Interactive Board - Obesity, Nutrition, Therapeutical Procedures

- Nutritional aspects in aesthetic medical treatments
- Post-thinning complementary aesthetic therapeutics

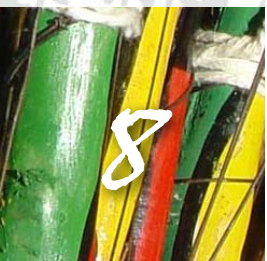

11. 2nd Carboxy-therapy International Symposium

12. How I treat

- Acned and seborrheic keratoses
- Cutaneous ichthiosis and xerosi
- Sebaceous glands hyperplasia
- Recidivous acne
- Female alopecia
- Hyperchromia of eyelids
- Hypertrophic keloids and scars
- Acne and Rosacean
- Hirsutism and Hypertrichosis
- Teleangectasis of the face

13. Session of commented videos

- Technique of poli-l-lactic acid application on bosom and neck flaccidity
- Treatment of microumbilical flaccidity with lifting threads
- Bulgarian tensors in the treatment of buttock flaccidity
- Facial rejuvenation with photodynamic therapy
- Cutaneous tumors with photodynamic therapy
- Treatment of facial wrinkles with platelet rich plasma
- Facial remodelling with PMMA in patients with lipodystrophy (HIV+)
- Body flaccidity with radio frequency
- Cutaneous depressions: subscission vs. fillings
- Treatment of axillary hyperhidrosis with botulin toxin nasal aesthetics. Combined treatment

14. Free subjects

15. Presentation of scientific works of Post-Graduation students

“Lato Sensu” in Aesthetic Medicine of Souza Marques Medicine School with rewards

16. Satellite Symposium

Legal and ethical implications in the formation and exercise of Aesthetic Medicine Practice

17. Presentation of approximately 20 medical-aesthetic “live” procedures, with direct transmission from the hospital environment to the Convention Center. Procedures will be performed by national and foreign specialists in an interactive way, and presenting the latest novelties in materials, equipment and medicines used in Aesthetic Medicine.

18. Aesthetics of the nasal and perioral area

- Phenol peeling
- Labial atrophy
- Definition of labial contour
- Nasogenian groove and labial commissure
- Uplifting of nasal tip

19. Present therapeutical procedures in cellulitis, localized fat and cutaneous flaccidity

- Intradermotherapy. Radio frequency
- Subcision. Cutaneous fillers
- Ultra-shape. Ultra-contour and Belle-contour - Accent
- Carboxy-therapy. Ozone therapy
- Combined treatment
- Lipoaspiration

20. Hi-Tech in Aesthetic Medicine

21. Medical-Aesthetic approach of feet

- Nail affections (Ungueal dystrophies)
- Hyperidrosis
- Xerodermia and Fissures
- Microveins
- Bad posture
- Lichenification, Callosity
- Malformations - Surgical indications
- Most frequent dermatoses in facial rejuvenation
